Kenwei

Kenwei's stylish and feature packed Video intercoms are getting even better. Already ahead of the game with exceptional levels of customisation and enhancement, the new items include a pinhole door station and output relays enabling lift interfacing with systems like the Concept 4000. Incorporating sleek styling and utilising the latest in electronic technology - this is Kenwei's best 4-wire Video Intercom system to date.

Apartment Video Intercom Solutions

Kenwei's Apartment Video Intercom solution offers a stylish and unique addition to your apartment's security and access control solution. These highly reliable 4-wire Video Intercom systems support up to 128 units and allows you to monitor the entry point from up to four Video Room Stations or your TV.

Integrated Access Control

All of the standard door stations are available with an integrated RFID reader allowing gate release from the door station using Kenwei's proprietary RFID tags.

Memory Options

At every press of the door station button, selected touch sense monitors can record an image on either internal or removable memory. Snapshots can also be taken at the press of a button on the Video Room Station.

Apartment Systems

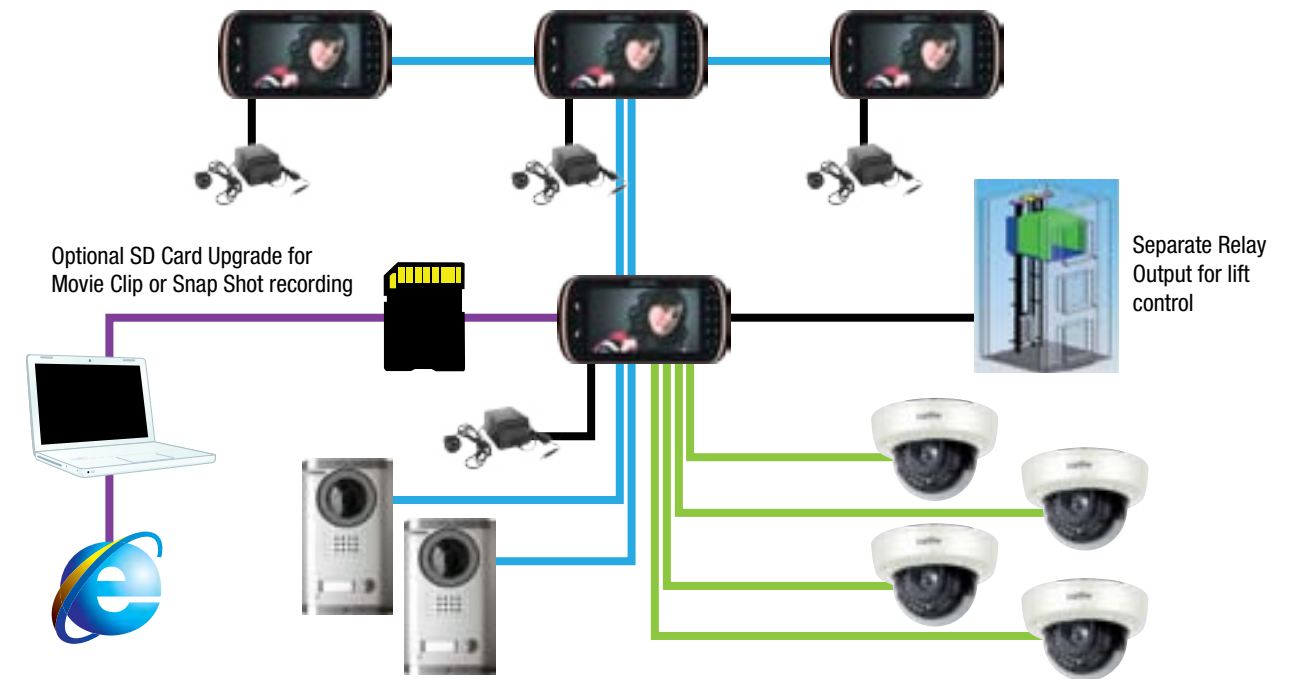

The 128 Door Entry station is a weatherproof unit with a brushed aluminium finish. The unit features an adjustable camera and LEDs for nighttime illumination, and a rugged digital code pad with an EM format Reader for door unlocking via an access card or tag.

Additional Cameras

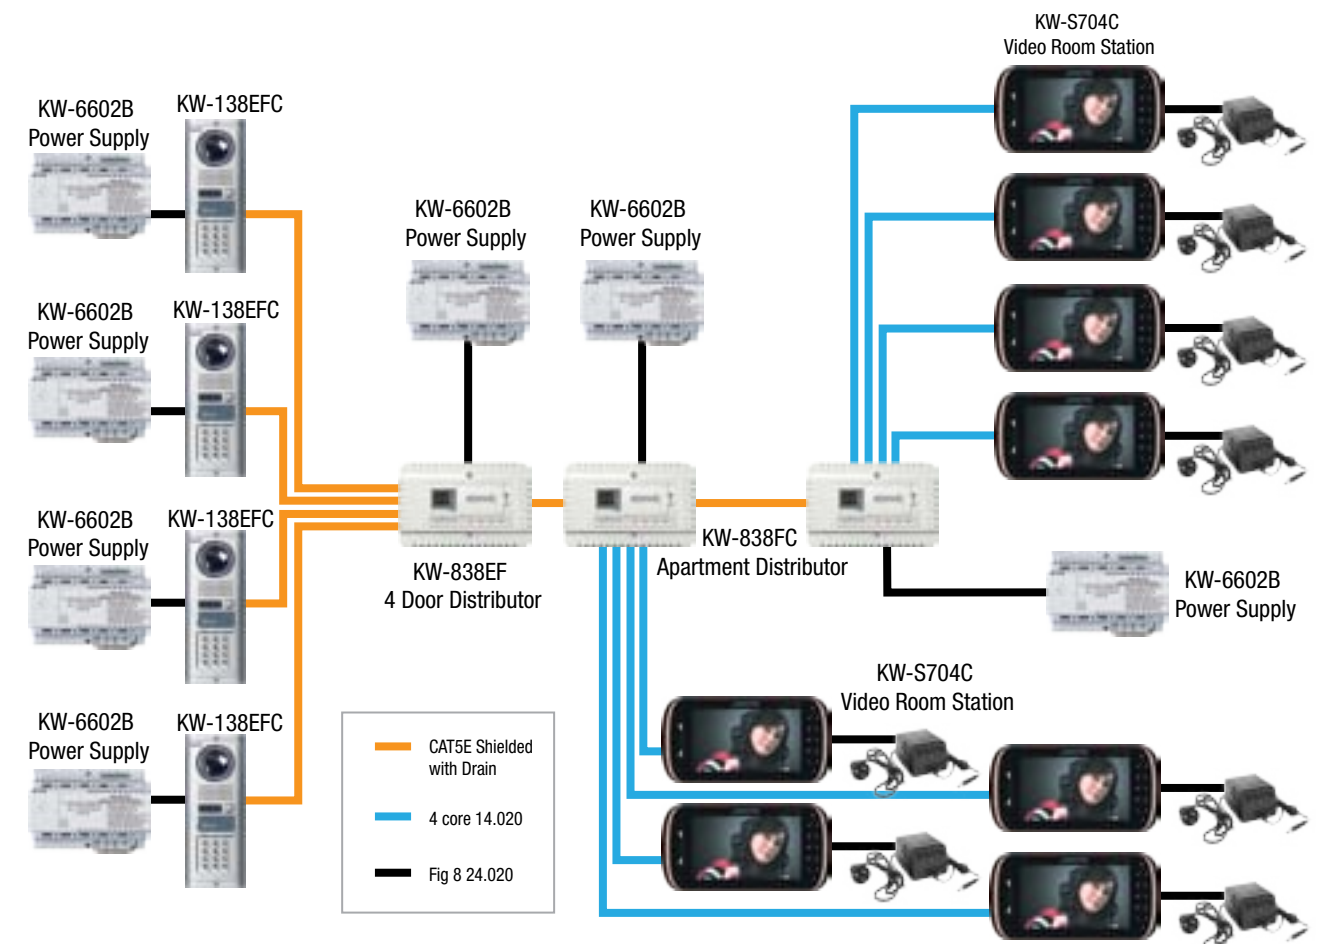

Depending on the system in question, up to 4 CCTV cameras can be added as additional video sources. These can be individually selected and viewed from each monitor.
